Fire Policy For Hanley

Fire Officers

Sally is the Fire Officer. Lisa, Sue and Simon are Deputy Fire Officers. If there is a fire, they will be responsible for evacuating the building.

If you hear the fire alarm, assume it is a fire. If it is a practice, you will have been told about it.

If it is known that a pupil has set off the fire alarm, Sue or Simon will decide whether to evacuate the building.

Fire Procedure

Fire alarms are set off automatically if there is a fire and can be activated at specific fire alarm panels.

If fire sensors are not working, and you see a fire - lift the plastic cover on the box and press hard.

When the alarm sounds, take the following action:

- Evacuate the premises in an orderly manner using the nearest exit and report to the assembly point
- Follow the instructions of the Fire Officer
- Walk calmly, do not run
- Do not stop to collect personal belongings
- Do not collect animals
- Do not re-enter the building until told to do so by the Fire Officer
- Do not tackle the fire
- Simon Jones will check field/polytunnel assemble at fire assembly point
- Simon Rowe checks A and B Blocks are evacuated
- Lisa and Sue check Unit 2 is evacuated
- Sue calls the fire brigade

Fire Assembly Point

If a fire occurs, everyone should assemble on the yard, in Bridge stage groups, where a register will be taken. If the workshop is on fire, the assembly point is on the grass in front of the main building.

Fire Risk Assessment

The fire risk assessment for the Hanley site will be reassessed annually or sooner if building alterations make it required.

Employees should report any concerns regarding fire procedures to the Health and Safety Lead Sue Hornby, so the school can investigate and take remedial action if necessary.

Fire Equipment

The fire alarm and extinguishers will be maintained within the manufacturers' specifications and certified as such.

Fire Logbook and Checks

The Fire Warden will maintain and carry out the checks required by the Fire Logbook as required by the Fire Risk Assessment. The fire risk assessment and all relevant documents are stored in the risk assessment and policies folder on the GSuite shared Drive. [click here for the Risk assessment](#)

The fire alarm is tested weekly on Fridays after debrief.

Fire practice takes place termly.
