

Bridge School Malvern

Health and Safety Policy

Introduction

Bridge School Malvern (BSM) aims to manage health and safety effectively and to minimise risk to our pupils, employees, volunteers and visitors.

Under the Health and Safety at Work Act, section 2(3), we need to demonstrate that we are committed to proactive safety management. We aim to maintain a safe working environment by constant monitoring of health and safety procedures and practices. It is our aim to identify and control safety issues through risk assessment; delivering Health and Safety training to all staff & pupils engaged in practical activities on site; review and monitoring at monthly staff meetings; and an annual audit and review by the Lead and Deputy Health and Safety Officers.

Pupils, staff and volunteers who breach the Health and Safety Policy will be subject to disciplinary action. This action will be carried out when pupils, staff or volunteers place themselves or others in unnecessary danger through negligence, horseplay, stupidity or deliberate acts.

The Health and Safety Officer (HSO) is Kath Barclay and the Deputy Health and Safety Officers (DHSO) is Neil Hornby. Their contact details are:

Neil Hornby: 07791509728 neilhornby@bridgeschoolmalvern.org

Kath Barclay: 07813807545 kathbarclay@bridgeschoolmalvern.org

Risk Assessments

Master copies of all risk assessments are kept in the Risk Assessment folder in the main office. This will be shown to all new staff and volunteers at induction who may photocopy for their own reference as required. They are working documents and amendments or updates should be written on the master copies as necessary. Staff and volunteers must inform the HSO or DHSO of any such changes. The HSO or DHSO will inform the rest of the team. Identification of hazards is crucial so that risks can be minimised. Staff and volunteers undertaking a task for which there is no risk assessment, must write one and inform the HSO or DHSO.

It is essential that pupils have an understanding of the health and safety aspects of their work and working environment, and the precautions that are required to work safely. It is a legal requirement of the Health and Safety at Work Act to provide training, information and instruction. All Coaches are expected to refer to health and safety/risk management at the start of their training sessions and to monitor the session for risks throughout.

No one should use machinery that they are not trained to use. Staff and volunteers should speak to the HSO or DHSO if training is required.

Personal Protective Equipment (PPE)

PPE will be supplied free of charge. It is the responsibility of pupils, volunteers and staff to ensure such equipment is used and stored properly. Examples of PPE include the following:

- Safety boots – to be worn during all practical activities such as maintenance, construction, woodwork and animal care.
- Gardening Gloves – must be worn for all horticultural tasks and lifting where the hands are at risk.
- Gloves must be worn on the holding hand when sawing.
- Safety goggles must be worn when working with metal against metal, eg hammering, filing etc.
- Overalls must be worn when working with animals, painting, wood preserving etc.
- Helmet, visor, high visibility vest, ear protectors and harness– must be worn when strimming. Other similar equipment must be worn when litter blowing, maintaining tools etc.
- Catering hats and aprons; oven gloves when handling hot items in catering.
- Face masks where Covid rules require this.

Hygiene

Disposable gloves to be worn when handling and serving food.

Use disposable blue paper towel to dry hands (not washable cotton towels) in the kitchen.

Smallholding boots and overalls must be removed in the boot room and not worn inside the building.

Overalls worn for inside animals must be stored in the animal care room.

Hand washing facilities are available and hands should be washed after contact with the animals, going to the toilet, removing overalls and boots and before eating. Staff are responsible for giving effective hand washing advice to all pupils and should supervise hand washing.

Food and drink should not be consumed around the site. Eating and drinking is restricted to designated areas only during break times only and supervised by staff. Water bottles are allowed on site in hot weather, but advice must be given not to touch the lid area with hands particularly if working in the animal or growing areas.

Infection awareness

BSM is a smallholding site with a range of pets, poultry, farm animals and an organic growing area. Consequently there will be risks to health. Information on E. coli, Weil's Disease (leptospirosis), snake bites and heat stroke will be provided at staff and volunteer induction. It is staff and volunteers responsibility to read these documents carefully so that they are aware of prevention and symptoms. Heat stroke is a medical emergency and will be dealt with by a First Aider but information is included in the staff and volunteer induction so that they can recognise the symptoms, take necessary measures to reduce risk for themselves and others, and react appropriately.

Tetanus is a serious but rare condition that can be fatal if untreated. The bacteria that causes tetanus can often be found in soil and manure. Go to minor injuries immediately if you sustain a deep wound, especially if it contains dirt or a foreign object, or if you do not know if you have been fully vaccinated against tetanus.

All staff and volunteers must check with their doctor that their tetanus vaccination is up to date.

Accidents

All accidents must be reported to a First Aider for treatment immediately. All accidents, however minor, must be recorded. If staff or volunteers witness a near miss or potential accident, they must inform the HSO or DHSO as soon as possible.

Should an injury be RIDDOR* reportable, it will be reported to the Governors and an investigation will be carried out. The Charity Commission will also be informed of any serious accidents that require professional medical attention- and a significant contributory factor was our failure to implement a relevant policy. There is a list of current qualified First Aiders on the health and safety notice board.

*The Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013

Medication

Under no circumstances must any medication (pills, mixtures, creams, sprays etc) be contained within the first aid boxes or kits, or dispensed by a First Aider. The sharing of personal medication such as Paracetamol, Aspirin or creams with pupils is not allowed under any circumstances.

Parents/carers of children requiring prescribed medication must complete an administration of medicines permission form. The medication will then be administered by the appointed staff, currently Diane H or Tara S as necessary. See Administration of Medicines Policy.

Machinery

No one should use or operate any machinery before they have received the required training relating to that equipment. This also applies when pupils are on

a placement or visit. No one should use, or supervise the use of, equipment they feel unsafe using.

Staff or Volunteers who use equipment that they feel is unsafe or faulty in any way, you must alert all users to it, remove it from use, and inform the HSO or DHSO immediately.

All portable powered equipment will be PAT tested annually. Personal portable electrical equipment must not be used on site. All equipment is serviced regularly. Refer to PUWER* folder in office for details of specific equipment.

*Provision and Use of Work Equipment Regulations, 1998.

All new equipment purchased must be PUWER compliant. Checklists are available in the PUWER folder.

Hazardous Substances

The Control of Substances Hazardous to Health Regulation (COSHH) requires us to take steps to ensure that substances do not harm pupils or staff. This includes all kinds of substances such as kitchen cleaners, paint, fertilizers, disinfectants etc. PPE must be worn as appropriate to each activity, eg gloves and goggles. For advice on necessary PPE and hazards relating to particular substances, refer to the Data Sheet in the COSHH folder or speak to the HSO. Some people may be susceptible to allergies when handling chemicals. Pupils should be told to notify a member of staff if they notice any changes in their general well being after contact with chemical substances. It is imperative that when purchasing any substance for which there is not already a Data Sheet, that one is acquired and filed in the COSHH folder. Substances with unusual or particular risks must be reported to the HSO.

Fire Safety

Fire results in many deaths nationally every year and can put companies out of business. Steps have been taken to minimise the risk of fire. The building is equipped with fire extinguishers and fire alarms that are checked and tested on a regular basis.

Smoking is strictly prohibited.

Staff and volunteers will be given a copy of the Fire Policy and Procedures at their induction.

Currently Tara Spaul is the Fire Officer for Hanley Site and John Roe for the Business Centre Site.

Manual Handling

Instruction must be given in safe handling techniques when it is necessary to move or lift an object. All pupils, staff and volunteers must not attempt to lift an object if they are unaware of how to lift or move it safely.

HSE advice on manual handling is available in the Health and Safety folder in the main office. All staff and volunteers must refer to this and the manual handling

risk assessment. The manual handling risk assessment will be given to staff and volunteers at their induction.

Alcohol and Drugs

Alcohol or drugs must not be consumed whilst at BSM or on Hanley Workshops premises. Nor should anyone be under the influence of alcohol or drugs as a result of consumption prior to arriving at BSM.

BSM reserves the right to take disciplinary action in relation to drugs or alcohol consumption, which affects the work of pupils, staff and volunteers. BSM will also attempt to help any pupil, employee or volunteer with alcohol or drug related problems and such matters will be treated in the strictest confidence.

Mobile devices

Staff and volunteers will be required to keep their mobiles on and charged at all times to aid communication between the unit and field areas but personal calls or messages should not be attended to in the presence of pupils.

Pupils must hand all mobile devices in to reception at the start of the day. Pupils using a mobile phone or other mobile device on site is gross misconduct.

General points

All contractors working on site must complete a Contractor Evaluation form before starting work and must be DBS checked to enhanced level.

All other units on the Hanley and Sixways industrial estates are out of bounds to pupils at all times. Pupils must always inform their Coach if they intend to leave the group or the site for any reason.

The Willow is not a recreation room and is out of bounds to pupils unless supervised by a member of staff/volunteer.

BSM is not responsible or liable for the loss of, or damage to, personal possessions.

Any concerns, observations or questions should be discussed with the HSO or DHSO immediately.

Additional Information for Coaches - Training young people in safe working practices

Health and safety should be the first unit taught in all vocational areas. Health and Safety awareness is a priority at all times. Most accidents in the workplace occur with employees under 25 years old. This is generally because they do not have the experience or knowledge, or because they are not confident to report their concerns or observations or do not know how to do so.

All vocational Coaches and support staff/volunteers must:

1. Demonstrate safe working practice at all times.
2. Always take health and safety concerns seriously.
3. Staff and volunteers must make sure pupils know who to speak to if they feel unsafe or have concerns about the safety of equipment etc. This will be their Coach in the first instance and then the HSO if they are not confident that their concerns have been listened to. If any action is required for general safety i.e unsafe furniture or equipment, remove from use and report to the HSO immediately.
4. Staff and volunteers make sure they know who the HSO and DHSO are and how to contact them (contact details are on the H&S notice boards in the entrance at Hanley and BBC sites).

General BSM safe working practice rules:

- **Always** wear appropriate PPE.
- When sawing wood, **always** wear a suitable protective glove on the holding hand and use the sawing horse.
- When working with metal against metal, eg hammering a nail, filing metal, **always** wear safety specs.
- When working with potentially hazardous dry substances, **always** wear a dust mask **and** refer to the COSHH Data Sheet.
- When working with liquids that give off fumes, eg paints or preservatives, **always** work in a well ventilated area **and** check the COSHH Data Sheet for other risks such as PPE, length of exposure and flammability etc.
- Long hair must **always** be tied back during field work to avoid the necessity of touching the face whilst working with composts and animals.
- **Always** return sharp knives and scissors to the main office when they have been cleaned, dried and finished with. **Never** ask a pupil to collect or return sharps on your behalf (or keys).
- **Always** be aware of safe working distances and remind pupils to be aware of what and who is around them. Remember, not being aware of one's own body position and a lack of spatial awareness are symptoms of dyspraxia, which the young person may not be aware of themselves.
- **Never** assume a young person has read and understood instructions, even if they say they have. Seek verbal confirmation of understanding.
- Remind pupils that they are responsible for their own safety and the safety of those around them. It is BSM's responsibility to provide safe equipment and PPE, it is their (and your) responsibility to use it safely.
- Under no circumstances should pupils leave classroom, unit, poly tunnel, grounds or Hanley or BBC sites without telling a member of staff where they are going.

The two most common workplace accidents relate to poor manual handling skills and slips, trips and falls. Consequently:

- Read the HSE guidelines on safe manual handling and read the risk assessment. Speak to the HSO or DHSO if you have any queries.
- Tools must **always** be carried with sharp and heavy ends towards the ground and **never** over the shoulder.
- Wheelbarrows must **always** be well balanced and **never** overloaded
- Tools must **always** be put away and never left on the ground. They should be upright when not in use and not on the floor.
- Pupils must **always** walk sensibly around the site and **never** run.

Finally, the best way to avoid accidents is for Coaches to keep their work areas clean and tidy and always risk assess. Pupils will follow the example of their Coaches if they are firm and consistent in applying the rules.
